In the history of SIG SAUER®, 2008 will be remembered as the year that changed everything. With the introduction of our new SIG SAUER P250® pistol – with interchangeable caliber, frame, grip dimensions, and trigger length – a new era of handgun adaptability has begun.

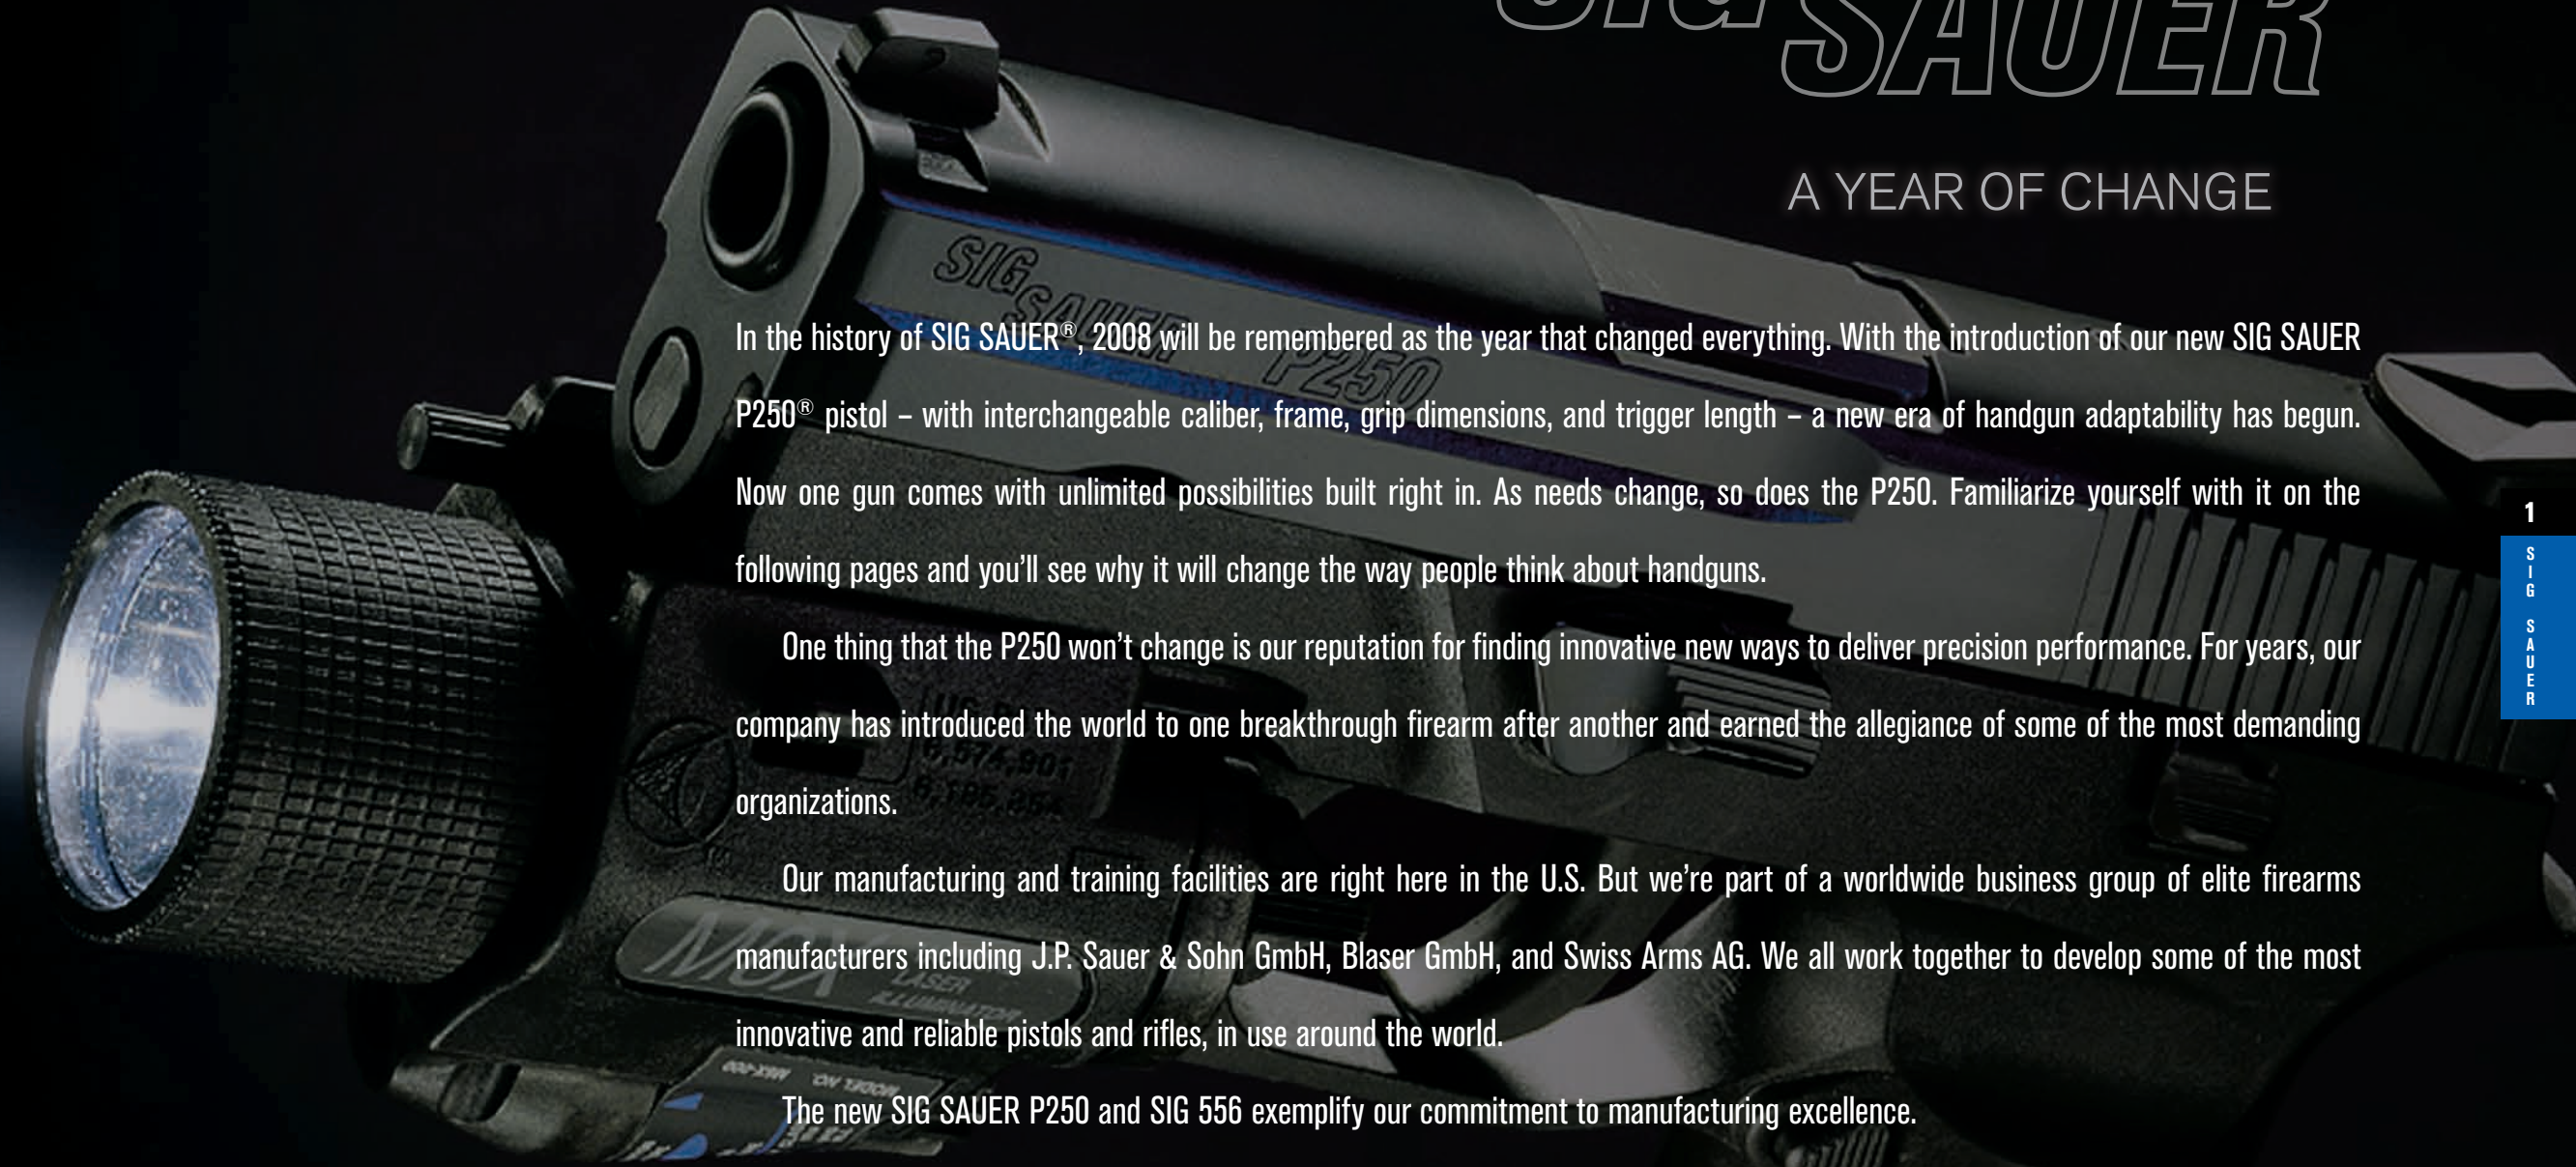

Now one gun comes with unlimited possibilities built right in. As needs change, so does the P250. Familiarize yourself with it on the following pages and you'll see why it will change the way people think about handguns.

One thing that the P250 won't change is our reputation for finding innovative new ways to deliver precision performance. For years, our company has introduced the world to one breakthrough firearm after another and earned the allegiance of some of the most demanding organizations.

Our manufacturing and training facilities are right here in the U.S. But we're part of a worldwide business group of elite firearms manufacturers including J.P. Sauer & Sohn GmbH, Blaser GmbH, and Swiss Arms AG. We all work together to develop some of the most innovative and reliable pistols and rifles, in use around the world.

The new SIG SAUER P250 and SIG 556 exemplify our commitment to manufacturing excellence.

*And you can be sure there will be more to come.*

The New SIG SAUER®  
**P250®**

**P250 Compact Two-Tone**

**P250 Full Size**

TRIGGER: DAO  
SIGHTS: SIGLITE® night sights  
SLIDE: Natural stainless, Nitron® finish

GRIP: Polymer  
CALIBERS: 9mm, .357SIG, .40S&W, .45ACP  
FEATURE: Integrated accessory rail

Modular frame

SIGLITE® night sights

Ejection port

It all starts with the modular frame and fire control assembly

**THIS IS THE ONE GUN THAT CHANGES EVERYTHING**, the new P250 is a modular pistol that allows the shooter to change caliber and grip size at will. One gun that adapts to perfectly fit any individual's hand size, shooting style, and purpose.

**P250®**  
*Everything Changes*

The new SIG SAUER® P250 is a radically new kind of pistol that carries the renowned SIG SAUER quality – the performance, the accuracy and the reliability – into an exciting new range of unlimited possibilities, all built around a single, serial-numbered metal frame and fire control assembly. Choose the caliber: 9mm, .357SIG, .40S&W, or .45ACP. Choose compact, subcompact or full size polymer grip module. Select

one of three grip sizes and two trigger lengths. Now it's a fully customized P250. But then you can change everything to meet new requirements. When you have a P250, you not only have a high-quality SIG SAUER pistol that perfectly meets your needs. You have the foundation for building a new SIG SAUER pistol that will meet changing needs without the slightest sacrifice in performance.

**P250 Compact Two-Tone**

# P250®

# Modularity

**THE KEY TO THE P250's VERSATILITY** is its metal frame and trigger assembly. At the heart of the P250 is a unique metal frame that fits easily into any of the polymer grip housings chosen, with its serial number showing through an opening. By selecting caliber, trigger length, and other options, a complete pistol is created. All told, one metal frame can be assembled into a wide range of calibers, sizes, triggers and grip configurations.

There's another significant advantage to the P250® frame. The slide rides on metal rails on the frame, and the slide is stopped by steel. This results in more precision and durability.

As anyone who's fired a pistol knows, one gun does not fit all. Unless that gun is the SIG SAUER® P250. Its revolutionary modular design makes it remarkably adaptable, giving the user the ability to combine several performance and fit options to create what handles and shoots like a custom made pistol... and then completely revamped in less than a minute to meet a completely different set of needs.

# P250®

## One Gun, Unlimited Options

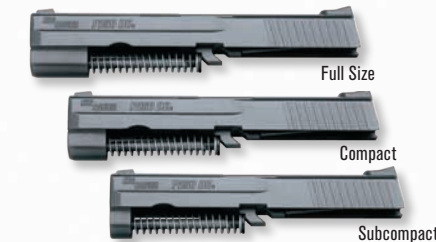

The primary performance option with the P250 is caliber. A single pistol can be set up as a 9mm, then changed to fire .357SIG, .40S&W, or .45ACP, and then changed back again. With numerous fit options that are interchangeable with each caliber, the possibilities are virtually endless (see schematic).

Not all models and variations are currently available. See our website for a complete listing.

P250®

The ability to accommodate a different shooter or situation with the same pistol, by changing its configuration, is a design breakthrough that will redefine the modern semi-auto handgun. But for the user, it's all about comfort and control.

The P250 is engineered so that a custom fit can be attained with the right combination of several components.

The P250 can be a full size, compact or subcompact.

It can have large, medium or small grips.

A standard or short trigger length can be used.

Perfect Shooting Comfort

The slide catch lever is ambidextrous.

The magazine release can be configured to work from either side.

In short, you can switch a P250® from a full-size gun for a person with large hands to a compact pistol for concealed carry by a small-handed individual, in minutes.

Ergonomic thinking is evident in other details, too. The double-action-only trigger is light enough – 6 lb. average – to allow a smooth pull while still providing that DAO margin of safety. And a beavertail keeps the shooter's hand out of harm's way.

**ENGINEERED TO FIT**  
SIG SAUER® engineers and designers have created three distinctive grip size modules to fit a wide variety of hand sizes from small, medium and large.

P250 ERGONOMIC GRIP SIZES

# Classic Series

## LEGENDARY PERFORMANCE

The modern standards for accuracy and reliability in a .45ACP pistol were set in 1976 – the year SIG SAUER® introduced the P220®.

Brought to the U.S. in 1985, this venerable model has served as the foundation for an entire family of exceptional pistols – the SIG SAUER

Classic Series.

In addition to a wide range of P220 configurations, the Classic Series now encompasses a selection of P226™ models – chosen by elite

forces around the world – in 9mm, .357SIG and .40S&W. This group also includes some of the most popular duty pistols – the P229®

semi-autos – chosen by law enforcement agencies of all types, from the U.S. Department of Homeland Security to small town sheriff's

offices. And for back-up, SIG SAUER offers slim, compact P239™ models and our smallest pistol, the P232™. Different calibers, dimensions

and features. All classics.

*Just what you'd expect from the people who've been setting the standards*

*for quality and performance for over 30 years.*

# P220®

**NEW** P220 Platinum Elite™

**STILL THE ONE TO BEAT.** If you're looking for a definition of SIG SAUER®'s well-known unfailing reliability, look at the P220. This is the pistol that can fire off 10,000 rounds in a day, without a single failure. It is the one that earned the trust of professionals who demanded a .45ACP that would always come through when the stakes were high.

# P229®

*Indestructible, And In Demand*

Available in 9MM, .357SIG, or 40S&W in either a DA/SA configuration or the revolutionary DAK™ with its smooth 6.5 lb. double-action-only trigger.

The P229 SAS is crafted in our Custom Shop and is ideally suited for concealed carry situations that require the firepower of a .40S&W in a compact size pistol. Features include a dehorned slide and frame, front night sight, DAK™ trigger and custom wood grips.

Other P229 Models include the Elite Stainless featuring a unique beavertail design and the fast- firing Short Reset

Trigger system (SRT™). Additionally, the stainless model borrows the same great features of the alloy-framed Elite and offers them in an all-stainless configuration.

The P229 Equinox® is a standout wherever it goes. This Custom Shop model is accented with nickel controls, custom wood grips and custom engraving on the slide's right side and features a TRUGLO® Tritium Fiber Optic front and SIGLITE® rear night sight combination.

P239 Two-Tone

## P239

TRIGGER: DA/SA, DAK™  
SIGHTS: Post & dot contrast sights,  
SIGLITE® night sights  
SLIDE FINISH: Nitron®  
FRAME FINISH: Black hard coat anodized  
CALIBERS: 9mm, .357SIG or .40S&W  
FEATURES: Slim profile for concealment  
4 point safety system

FOR THOSE TIMES WHEN SIZE  
MATTERS, A COMPACT SIG SAUER®  
CLASSIC MEASURES UP. It's good

to know that even in situations that call  
for a smaller pistol – back-up, concealed  
carry, personal protection – there's a  
perfectly sized SIG for the job – whether  
it's the large-caliber power of the  
P239 or the contoured compactness  
of the P232.

## P239 SAS™

TRIGGER: DAK™  
SIGHTS: SIGLITE® Front night sight,  
Post rear contrast sight  
SLIDE FINISH: Natural stainless  
FRAME FINISH: Black hard coat anodized  
CALIBERS: 9mm or .40S&W  
FEATURES: Hand dehorning on frame & slide  
Custom wood grips  
SIG SAUER Custom Shop logo

# P239

## Concealed Qualities

Designed for law enforcement  
professionals who want SIG SAUER  
reliability in a compact back-up pistol,  
we “*performance engineered*” the  
P239 specifically for concealed carry.  
Its single-stack magazine allows for  
a slim profile so it conceals easily yet  
still handles exceptionally well. The  
P239 is manufactured in 9mm, .357SIG

## P232 Stainless

TRIGGER: DA/SA  
SIGHTS: SIGLITE® night sights  
SLIDE FINISH: Natural stainless  
FRAME FINISH: Natural stainless  
CALIBERS: .380ACP (9mm Short)  
FEATURES: Hogue® Finger-Groove grip  
Excellent balance  
4 point safety system

Rounded snag-free edges on slide

and .40S&W, with either a DA/SA  
or smooth DAK™ double-action-only  
trigger. In addition to the basic Nitron®  
finish, the P239 is offered in Two-Tone  
and the ultimate compact concealed  
carry pistol, the P239 SAS, features a  
hand dehorned SIG Anti-Snag™ slide  
and frame.

## Four Point Safety System

**PATENTED AUTOMATIC FIRING PIN SAFETY LOCK** - Prevents contact between the firing pin and primer unless trigger is pulled.  
**SAFETY INTERCEPT NOTCH** - Prevents hammer from contacting firing pin unless trigger is pulled.  
**DECOCKING LEVER** - Safely allows the cocked hammer to be lowered into the Safety Intercept Notch.  
**DISCONNECTOR** - Prevents out of battery firing; ensures only one shot per trigger pull.

SIG SAUER®

## P232 Black

TRIGGER: DA/SA  
SIGHTS: Post & dot contrast sights

FEATURES: Ultra-slim profile for concealment  
Excellent balance  
4 point safety system

Hogue® finger-groove grip

# P232

## No Small Achievement

Small and light as it is, the P232 still  
delivers full measures of SIG SAUER  
reliability and accuracy. Chambered in  
.380ACP and featuring a fixed barrel  
blowback action, single-stack 7+1  
capacity, and the Four Point Safety  
System, this pistol is designed to be easily  
handled, carried, and fired, even by  
someone with large hands. The perfect

balance, smooth contours, and rounded,  
snag-free edges of its proven design  
make it ideal for personal protection.  
In addition to the standard blued P232,  
we also offer P232 Two-Tone and  
P232 Stainless models.

## Custom Shop

*The Best, Made Even Better*

The SIG SAUER® Custom Shop offers a wide range of services to keep your SIG SAUER pistol in peak operating condition including refinishing, action enhancement, sight replacement, and service programs. Nobody knows SIG SAUER pistols better than our expert Custom Shop gunsmiths. With years of experience and a detailed understanding of the SIG SAUER product line, our gunsmiths can bring your pistol back to top performance

and appearance using only original factory parts and finishes. Our master gunsmiths also do more than perform expert services for owners of SIG SAUER firearms. They design and produce special edition pistols that combine superior features with hand fitting and finishing. The newest addition to our line of Custom Shop models is the Platinum Elite series. Offered on the P220, P226, and P229 models, this series

features a pronounced and ergonomic beavertail frame, SIG Short Reset Trigger™, a natural stainless slide and finish, as well as SIG factory aluminum grips in a natural stainless color.

## The Competitive Edge

Each of these finely crafted handguns offers a unique combination of superior accuracy, ergonomic design, and reliability that will provide any shooter with a significant competitive advantage. Designed to dominate in the fast-paced world of competitive shooting, the P226 X-Five's slide and cold hammer-forged barrel is capable of delivering sub-two inch groups at 50 yards, redefining speed and accuracy.

As a result of demand for a P220 with a longer slide to compete head-to-head with other 5" barreled .45s, our engineers designed the P220 Match. The P220 Match is an 8+1 capacity pistol with a Two-Tone finish and available in three different configurations, the P220 Match (DA/SA), the P220 Match SAO, and the P220 Super Match. 1911 Target models, available in .45ACP, feature match grade barrels, machined internal

components, adjustable target night sights and custom wood grips.

The Mosquito Sport raises the bar for .22LR target shooting with it's 4.9" weighted barrel and extended sight radius.

## Revolutionary In Every Detail

Building reliable, duty capable firearms for military and law enforcement is the toughest standard to meet in manufacturing. It's also the standard by which virtually every SIG SAUER® pistol is measured. That's because our customers in law enforcement and the military bet their lives on SIG pistols everyday.

When SIG SAUER decided to create a 1911 pistol, we set out to make it the best; in fact, they have been called the

best out-of-the-box 1911s you can buy. No plastic parts. Only premium internal components that include a match-grade barrel, hammer/sear set and trigger are used.

The Platinum Elite is the newest addition to the SIG SAUER 1911 family. The 1911 Platinum Elite is a two-tone Custom Shop pistol with a Nitron coated stainless frame, duotone stainless slide, and aluminum grips with a natural stainless color.

## Continuing The Evolution

Capitalizing on the design of the larger version 1911's, these carry model handguns feature precisely machined slides and internal components, match-grade barrels, front strap checkering and other quality details.

1911 Carry models have a shortened stainless slide mounted on a full-size stainless frame. The 1911 Platinum Elite™ Carry is produced in the SIG SAUER® Custom Shop in a two-tone finish with aluminum grips and adjustable

combat night sights. The 1911 Carry, with custom wood grips and Novak® night sights, is available in Natural Stainless or Nitron® finish. The smaller 1911 Compact has a compact frame and 7+1 capacity, in Natural Stainless or Nitron® finish. With a two-tone look, rosewood grips, and lightweight alloy frame, the 1911 C3 is excellent for concealed carry. For the ultimate, there's the 1911 Compact RCS™ from the Custom Shop, where it is radically dehorned.

## Mosquito®

### Scratching The Itch

Ergonomically designed to give the best shooting experience, the Mosquito® is built on a tough polymer frame and features an accessory rail, rugged blowback system, fixed barrel and adjustable sights. Multiple safety features include a manual safety, firing pin safety, magazine safety and key operated integral lock.

There are five Mosquito models available. The Mosquito Reverse Two-Tone has a stainless finish on the frame with a blued slide. The more

traditional Mosquito Two-Tone has a stainless finish slide and black polymer frame. For the classic professional look, there's the basic Mosquito with a blued overall finish. The Mosquito with Threaded Barrel, which also has a blued finish, is designed to accept most suppressors. For those who take their target shooting more seriously, the new Mosquito Sport features a longer sight radius and is fitted with an extended barrel and barrel weight.

### MOSQUITO TARGET PACKAGE

#### Mosquito® Target Package

Mosquito Target Package includes a durable polymer bridgemount accented with the SIG SAUER® logo which attaches to the accessory rail and a 1" red dot sight with rings and battery.

and that you must be  
18 or older to purchase  
and always use eye  
protection when using  
AirSoft products.

# AirSoft

*Practice Made Perfect*

FOR THE MOST REALISTIC TARGET PRACTICE OR TRAINING, SIG SAUER® offers three AirSoft replicas that simulate the weight and feel of the real models. Each has an orange muzzle indicator for safety and fires 6mm pellets. The gas-operated P226 and P229 AirSoft pistols feature metal slide and frame. The SG 552 AirSoft rifle – an automatic electric gun – replicates the famous Swiss Arms rifle, right down to the folding stock.

# Tactical Rifles

## PRECISION-ENGINEERED PERFORMANCE

Some of the world's most respected gunsmiths and firearms designers have put their best thinking into the design and production of the elite family of tactical rifles now available in the United States exclusively from SIG SAUER®.

Each model we offer is as distinct as the purpose it serves, yet they all have essential characteristics in common. Innovative design. Superior materials. Painstaking machining and assembly. All resulting in tactical rifles that shooting professionals have learned to trust for their extraordinary accuracy and absolute reliability.

The U.S.-produced version of the famed Swiss Arms SG 550™, the semi-automatic SIG556™, offers a formidable combination of precision and sheer firepower. Every detail of the Tactical 2 bolt-action rifle helps make it a stable, highly effective multi-caliber shooting platform capable of pinpointing targets at long ranges. And the SSG 3000 adapts to custom-fit the shooter, making every shot as accurate as humanly possible.

*Just what you'd expect from the people who've been setting the standards  
for quality and performance for over 30 years.*

SIG556™

SIG556 SWAT™

**SIG556 SWAT™** Chambered to handle 5.56mm NATO rounds, the SIG556 SWAT rifle delivers exceptional performance even under the most challenging conditions. From its 16" military grade cold hammer-forged barrel, to its weight-reducing aircraft grade aluminum alloy trigger housing, to its adjustable folding buttstock, the SIG 556 SWAT means business. And because it's from SIG SAUER®, accuracy and reliability are engineered into every detail.

The SIG 556 SWAT incorporates the two-position adjustable gas piston operating rod system developed by our sister company, Swiss Arms. It also features a smooth two-stage trigger, high strength steel receiver with Picatinny rail, super-tough Nitron® X™ finish, anodized aluminum alloy forearm with four integral rails for mounting accessories, high performance flash suppressor, flip-up front and rear combat sights, Grip-Lite™ forend grip with tactical LED flashlight, and 30-round magazine.

SIG556 ER™

SIG556 HOLO™

**CHAMBERED TO HANDLE 5.56MM NATO ROUNDS, THE SIG556 rifles deliver exceptional performance by employing a high performance two position adjustable gas piston operating rod system using standard AR type magazines, and folding stock configurations available for each model.**

SIG556™

*Whatever The Challenge*

**SIG556 ER™** Capitalizing on the legendary status of the SIG 550™ Swiss tactical rifle with law enforcement and military organizations around the world, the SIG556 ER shaves a pound of weight by incorporating the redesigned alloy trigger housing, AR style magazine and flash suppressor. Using flip-up front and rear sights, the ER model brings the same high level of performance and features found in all SIG556 rifles in a more affordable package.

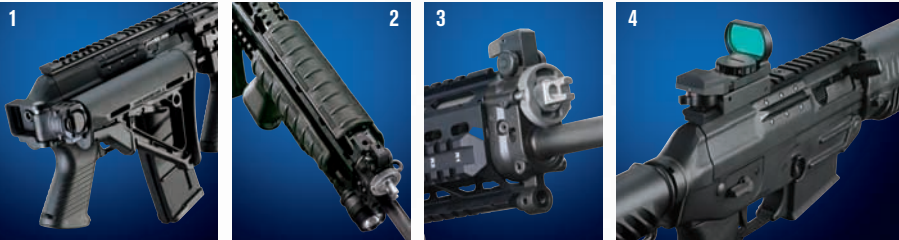

**The SIG556 HOLO™** has a proven two-position adjustable gas piston operating

rod system joined to a lightweight alloy trigger housing that accepts standard AR magazines. The vented non-slip polymer forearm has three Picatinny rails for accessory mounting. Sight options include front combat sight, flip-up rear sight, and a red dot style holographic sighting system that allows for quick target acquisition, with four illuminated reticle patterns with adjustable intensities. The SIG556 buttstock is collapsible and has a rubber butt pad and a number of sling attachment points.

(Rifle shown with optional accessories).

BASED ON THE SUCCESSFUL SIG556 PLATFORM, the SIG556 DMR with its heavy contour barrel provides the optimum in stability and accuracy required for pinpoint long range shooting.

SIG556™

A Logical Extension

The SIG556 DMR features a 24" military grade cold hammer-forged heavy contour barrel. The rifle is chambered in 5.56mm NATO, with a twist rate of 1 in 9". The match grade heavy barrel features a target crown and matte black nitride finish for the ultimate in corrosion resistance.

The forearm, housing the gas operating system, is a vented non-slip polymer featuring the SIG TriRail™ design with three integrated Picatinny rails for mounting a bipod and other accessories.

The Picatinny rail equipped receiver is made of high strength steel with a durable wear-resistant Nitron X™ rifle

finish. The rifle comes standard with the flip up combat front and rear sight system.

The trigger housing is machined from an aircraft grade aluminum alloy forging with a hard-coat anodized finish designed to survive extreme conditions. The rifle comes equipped with an enhanced single stage target trigger, ambidextrous safety and is designed to accept standard AR magazines.

The ergonomically designed pistol grip features an integrated storage compartment.

**Magazine** – Polymer magazine combines light weight and strength for optimum performance.

**BARREL** – Cold hammer forged 24" heavy barrel with target crown.

## SIG556™ Technical

*Engineered to Every Detail*

*The SIG556™* features the same high-performance full length gas piston operating rod system used worldwide in the SG 551™ assault rifle. Gas volume is regulated by a two-position gas valve. A proven design that practically eliminates carbon buildup and firing residue from the rifle's interior, ensuring reliable function under the most extreme conditions.

SIG556 models use a military grade cold hammer forged barrel chambered in 5.56mm NATO, with a twist rate of 1 in 7" (DMR – 1 in 9"). The flash suppressor (excluding DMR) uses a standard .5 x 28 TPI thread pattern, ensuring compatibility with after-market accessories, with SWAT models featuring an integrated ACME thread for mounting sound suppressors.

The forearm is a vented non-slip polymer featuring the SIG TriRail™ design with three integrated Picatinny rails. The optional vented tactical quad rail forearm (standard on SWAT) is machined from aircraft grade aluminum alloy hard coat anodized for durability.

The Picatinny rail equipped receiver is made of high strength steel with a durable wear-resistant Nitron X™ rifle finish. The receiver mounted Picatinny rail features an integrated flip-up rear sight that works in concert with the front combat sight, providing iron sight performance and a back up sight option.

Select versions feature a red dot style holographic sight, using 4 different illuminated reticle patterns with adjustable intensity.

The trigger housing is machined from an aircraft grade aluminum alloy forging, hard coat anodized. Standard is a smooth two-stage trigger and ambidextrous safety.

The collapsible buttstock is available with a folding stock option, providing a solution for close quarters while retaining adjustability for individual shooters. The standard buttstock features a rubber butt pad, multiple sling attachment points, and a waterproof battery compartment. SWAT models include the Magpul® CTR Carbine Stock, and the DMR features the Magpul® PRS Precision Rifle Stock, with adjustable comb and length of pull. The ergonomically designed pistol grip features an integrated storage compartment.

## SSG 3000™

BLASER TACTICAL 2  
(BiPod Up)

SSG 3000  
(BiPod Down)

(Rifle shown with optional accessories).

FOR SINGLE-SHOT ACCURACY, THESE BOLT-ACTION TACTICAL RIFLES GO THE DISTANCE. Whether you choose the most advanced Blaser yet – the straight-pull Blaser Tactical 2 – or the SSG 3000, which fits and shoots like a custom rifle.

## Tactical

### SSG 3000™

The SSG 3000 has earned a strong following in law enforcement and special task force applications worldwide by optimizing precision and functionality. Key features of the tactical rifle are a heavy contoured, hammer-forged barrel, strong six-lug lockup, and a lightweight firing pin for reduced lock time. Just as important, the SSG 3000 is ergonomically correct. The McMillan™ stock design encourages a natural shooting posture and is fully adjustable to conform to the individual. The trigger is fully adjustable. Bolt and safety release operate silently. And barrel and receiver have a glare-free finish.

### BLASER TACTICAL 2™

Blaser rifles have long excelled at placing a round in a distant target. The Blaser Tactical 2 from SIG SAUER® now takes the Blaser approach to precision shooting to a new level. Its ambidextrous straight-pull bolt action, with auto-centering and no rotating parts, enables the shooter to chamber a round quickly and smoothly, with minimal effort. Barrel and bolt head can be switched in less than 60 seconds to change caliber. The ambidextrous polymer stock stabilizes the whole platform, with adjustable butt plate and cheek piece, optional rear rest for prone shooting, and bipod mount. And the trigger is fully adjustable, in weight, position and stop.

# SIG SAUER Academy™

SINCE 1990, MILITARY AND LAW ENFORCEMENT PROFESSIONALS, AS WELL AS RESPONSIBLE CITIZENS, HAVE TRUSTED SIG SAUER ACADEMY™ to provide effective firearms training. At the Academy, new skills, tactical knowledge and survivability are engrained through a combination of intense classroom work and hands-on experience sharing the SIG SAUER tradition of excellence.

**Our Training Staff** has years of experience in firearms instruction and defensive tactics gained from military, law enforcement, and government agencies, in addition to private research entities. We adapt our instruction to suit each student's abilities and levels, balancing classroom instruction with practice on the firing range.

**Our Training Center** is a state-of-the-art training institute that will test the most advanced students. The Academy's 128 acre facilities include indoor and outdoor ranges, classroom training coupled with hands-on training, tactical training areas, a 16-position rifle range, the Action Target Modular Tactical Shoot House and more.

SIG SAUER DVD's can provide you a simplistic approach towards improving your pistol knowledge and expertise. Both the "SIG Principles of Pistol Training" and "Concealed Carry" are taught by our SIG Academy professionals and are designed to produce immediate improvements in technique and proficiency.

## Training

### The Professional Firearms Resource

#### **SIG SAUER Academy™ Courses**

Offered are a wide selection of effective courses—for everyone from the novice shooter to military and law enforcement specialists. Courses include defensive and tactical training, firearms training and instructor development.

#### **Entry Level Training**

Courses offered in Handgun Orientation and Practical Handgun Skills teach the basics in safe handling, competent usage and the proper methods for care and cleaning of firearms.

#### **Handgun Training**

We offer a variety of handgun instruction designed to hone firearms skills for all levels of training. Course subjects include concealed carry, low light shooting, reflexive shooting, and more.

#### **Rifle Training**

Rifle users, instructors, and armorers get expert instruction in general and specialized rifle classes.

#### **Shotgun Training**

A number of classes in police, combat and competitive shotgun skills are offered.

#### **Specialty Training**

From range master and instructor training, to survival skills and land navigation, to active shooter response and more, the SIG SAUER® Academy provides the knowledge and training needed to hone skills.

#### **Contact us for more information.**

For information on available classes and training at the SIG SAUER Academy, as well as information on our range host program, visit [www.sigsaueracademy.com](http://www.sigsaueracademy.com) or call 603-679-2003.

### Service Plans

**Full Service Package** – our gunsmiths strip, inspect, replace springs, clean and lubricate your SIG pistol.

**SIG Service Plan** – includes cleaning, inspection, spring replacement, routine maintenance, night sights and performance testing of any used SIG pistol.

**Custom Tune Up Program** – a 5-year program to keep your new SIG SAUER® in great shape.

### Action Services

**Action Enhancement Package** – includes honing and polishing surfaces to lighten and smooth double-action and single-action trigger pulls.

**Short Reset Trigger™ Retrofit\*** – SIG SAUER® pistols can be retrofitted with this trigger, which can reduce reset travel by 60% or more.

*\*Not for single-action triggers, only available on P220, P225, P226, P228, P229 and P239.*

**1911 Trigger Enhancement** – gunsmiths hand-tune the trigger to reduce pull to as little as 4 lbs.

### Finish Services

Renew and improve your SIG pistol finish with these factory finishes:

- Nitron® Finish slide only
- Nitron® Barrel Finish
- Natural Stainless Glass Bead Finish

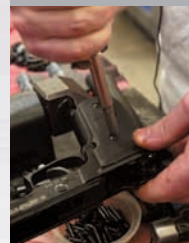

### Action Conversions

Our gunsmiths can convert various SIG SAUER® pistols to DAK™, SAO or DA/SA action systems.

### Sight Services

Available sight package upgrades include:

- SIGLITE® Night Sights
- TRUGLO® Sights
- TRUGLO® Front Sight
- Combat Sights (1911 only)
- Combat Night Sights (1911 only)
- Adjustable Rear Combat Night Sight
- Adjustable Night Sight

FOR KEEPING YOUR SIG SAUER® PRODUCT IN PEAK CONDITION, RELY ON THE GUNSMITHS IN THE SIG SAUER® CUSTOM SHOP.

With years of experience, intimate knowledge of the firearms, expert skills, and ready access to original factory parts and finishes, they have what it takes to make sure your SIG SAUER® looks its best and performs precisely.

**1911 AMBI Safety** – this ambidextrous safety gives you a choice of strong or weak hand control. (Only for models STX or TTT.)

**Date of Manufacture Certificate** – suitable for framing, this officially documents your SIG SAUER® pistol's model and date of manufacture or importation.

# Custom Services

## Expert Skills, Maintenance and Performance Testing

### Custom Services

**Barrel Re-Crown** – an 11° target crown removes minor wear marks to improve accuracy and appearance.

**Feed Ramp Polishing** – for easier cleaning, better performance.

**Short Trigger Installation** – reduces length of pull for small hands.

**Magazine Catch Reversal** – moves it to other side to meet your needs.

**Pistol Barrel Replacement** – our gunsmiths replace your old pistol barrel with an original factory SIG SAUER® barrel.

**1911 Magwell Upgrade** – factory installation of this upgrade for faster reloads.

**1911 Checkered Mainspring Housing** – get a better grip with this factory-installed upgrade.

# SIGLITE® Tactical Lights

STL-100C SIGLITE Mini Tactical shown on P226 Equinox

STL-100C SIGLITE Mini Tactical

STL-100 SIGLITE shown in pistol grip

STL-100 SIGLITE Tactical Light

STL-100 SIGLITE shown in belt sheath

STL-900L SIGLITE Weapons Light  
300 lumen output with integrated red laser aiming device

STL-300J STOPLITE shown mounted on SIG556 Quad-Rail

**STL-300J STOPLITE™**  
SIG SAUER'S new STOPLITE delivers over 300 Lumens of powerful illumination. Complete with a rotary selector, choose steady or momentary modes for strobe disorientation. Includes accessory hot shoe.

**BRIGHT IDEAS** – SIG SAUER® accessories are the perfect way to complement your firearms with essential products that incorporate the same level of high quality materials and functionality the SIG SAUER brand has always represented.

Accessories

AUTHENTIC SIG SAUER® ACCESSORIES enable you to maximize the performance and appearance of your SIG SAUER® firearm. Visit us online: [www.sigsauer.com](http://www.sigsauer.com) for additional information and our complete line of gear and accessories.

**Rimfire Conversion Kit**  
Save on ammunition costs, hone your shooting skills, and just have fun – the .22LR Rimfire Conversion Kit, available for SIG SAUER P220, P226 & P229 models features a hard coat anodized slide machined from solid aluminum billet. A complete replacement assembly, the Rimfire Conversion Kit installs as easily as field stripping the pistol. Simply remove the standard slide assembly, slide on the Rimfire Conversion Kit, add the included .22LR magazine, and you’re ready. The Rimfire Conversion Kit features adjustable target sights and comes complete in a hard carry case.

P220®

P226™

P229®

**Paddle Holsters**  
Available for P220®, P226™, P229®, P239™ and P250® models, these durable, contoured black polymer holsters feature an easy-to-use release system, fully adjustable for cant. Just press the lever and remove the pistol.

Mag Pouch

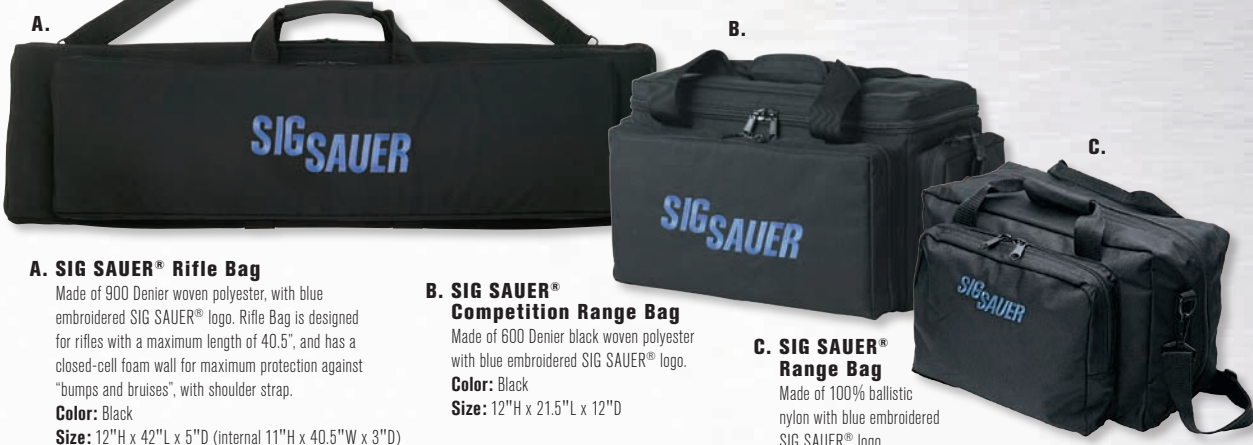

Walnut

**Replacement Grips**  
SIG SAUER® factory replacement polymer grips are available for all SIG SAUER® pistols. In addition, Diamondwood grips in black or rosewood, walnut grips, and aluminum alloy grips are available for select models.

Factory Magazines

**A. SIG SAUER® Rifle Bag**  
Made of 900 Denier woven polyester, with blue embroidered SIG SAUER® logo. Rifle Bag is designed for rifles with a maximum length of 40.5", and has a closed-cell foam wall for maximum protection against "bumps and bruises", with shoulder strap.  
**Color:** Black  
**Size:** 12"H x 42"L x 5"D (internal 11"H x 40.5"W x 3"D)

**B. SIG SAUER® Competition Range Bag**  
Made of 600 Denier black woven polyester with blue embroidered SIG SAUER® logo.  
**Color:** Black  
**Size:** 12"H x 21.5"L x 12"D

**C. SIG SAUER® Range Bag**  
Made of 100% ballistic nylon with blue embroidered SIG SAUER® logo.  
**Color:** Black  
**Size:** 10"H x 15"L x 9.5"D

Visit our SIG SAUER Pro Shop at [www.sigsauer.com](http://www.sigsauer.com) for a full description of our product offerings.
